

Security Changes for FedInvest Users

New Use of Credentialing Provider Will Impact How You Log In

Implementing Changes to Identity Verification at Log In

The Bureau of the Fiscal Service (Fiscal Service) is implementing the Common Approach to Identity Assurance (CAIA) as a credentialing provider to standardize access for its many applications. CAIA enables federated applications to accept user credentials from external Credential Service Providers (CSP). CAIA allows for two different methods of identity verification: 1) Personal Identity Verification (PIV) Card, Common Access Card (CAC), and LincPass; and 2) ID.me account.

Adopting Zero Trust Cybersecurity Strategy

Executive Order 14028, Improving the Nation's Cybersecurity, requires Fiscal Service to implement multi-factor authentication in a cloud infrastructure, as part of a sweeping government-wide effort to protect public privacy, the American economy, and trust in the government.

Implementing October 16, 2023

Beginning October 16, 2023, FedInvest will only be accessible by a 1) PIV/CAC/LincPass card, or a 2) ID.me account. FedInvest will be unavailable from Friday, October 13, 2023, at 9:00 PM ET through 5:59 AM ET October 16, 2023, while CAIA is implemented, replacing the current method for verification.

Maintaining Access Requirement

After CAIA implementation, users are required to log in to FedInvest every 120 days to maintain access. After 120 days, application access is removed, and users must enroll again to gain access.

Identity Verification Changes

PIV Card Identification Access

FedInvest users who currently possess a PIV/CAC/LincPass card will use their card and PIN to access FedInvest. Card holders do not need to create an ID.me account for continued access.

ID.me Identification Access

Users that do not have a PIV/CAC/LincPass Card must create an account with ID.me for continued access to FedInvest. ID.me will require your work email address to be listed as your **primary** email address.

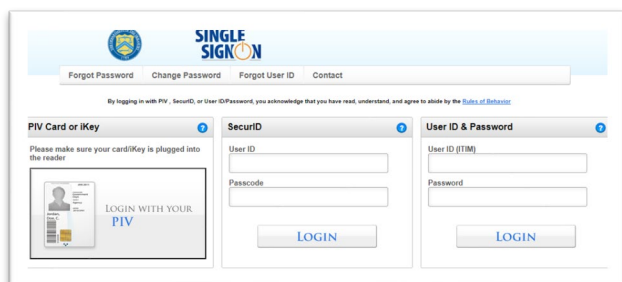

If you do not already possess an ID.me account, signing up for one through the Social Security Administration (SSA) or the Internal Revenue Service (IRS) may streamline the identification process, as these federal organizations require similar authentication.

If you have an existing personal account with ID.me, you will need to add your work email address to your existing account. You do not need to create a new ID.me account for FedInvest access. Using your ID.me account to access SSA or IRS systems will confirm that you have appropriate credentials in place for FedInvest.
